Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application,

☒ claims Nos. 12-13

because:

☐ the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

☒ no international search report has been established for the said claims Nos. 12-13

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.

☐ See separate sheet for further details

Box No. IV Lack of unity of invention

1. ☒ In response to the invitation to restrict or pay additional fees, the applicant has:
- ☐ restricted the claims.
 - ☐ paid additional fees.
 - ☐ paid additional fees under protest.
 - ☒ neither restricted nor paid additional fees.
2. ☐ This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.
3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is
- ☐ complied with.
 - ☒ not complied with for the following reasons:
see separate sheet
4. Consequently, this report has been established in respect of the following parts of the international application:
- ☐ all parts.
 - ☒ the parts relating to claims Nos. 1-11 .

REPORT ON PATENTABILITY
(SEPARATE SHEET)**

Re Item I

Basis of the opinion

1.(a) The present opinion is based on the application claims 1-11 (see Items IV and V below).

(b) It is noted that the amended claims as filed on 13/1/05, and particularly amended claim 1, claim a polymerisation process in which the dosing of the initiator is conducted "from the point in time at which none of the monomer has been polymerised until **"at least 70%"** of all the monomer is polymerized," i.e. the dosing of initiator as claimed in the said application claim can be conducted at any point after none of the monomer has been polymerised (as the application claim 1's use of the phrase "at least 70%" does not give any upper limitation at 70%, and thus does not exclude any such higher percentages).

Re Item IV

Lacks of unity of invention

In consideration that the original unamended application claims, and particularly claim 1, relating to an "essentially vinyl chloride free" suspension polymerisation process for polymerising styrene monomer as described in the said claim 1, are not considered to be novel and inventive (see Item V below and the lack of unity sheet B attached to the original search report), the original application contains several lacks of unity according to Rule 13.1 PCT.

The applicant was originally invited to either restrict the application claims or pay additional fees for the further inventions relating to the said lack of unity.

The applicant decided not to pay the additional fees and consequently the substantive examination has been based on the first invention only, relating to original application claims 1-11.

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanationssupporting such statement.

1. (a) The following documents are cited in the present opinion. The numbering will be adhered to during the rest of the proceedings :
